

REMARKS/ARGUMENTS

The filing receipt (mailed February 27, 2004) was accompanied by a Notice to File Corrected Application Papers in which the following statements were made concerning the drawings as filed:

Replacement drawings in compliance with 37 CFR 1.84 and 37 CFR 1.121 are required. The drawings submitted are not acceptable because:

The drawings must be made on paper that has a white background . . . See Figure(s) 2.

The Applicant submits that the enclosed Fig. 2 is in compliance with 37 CFR 1.84.

The Applicant notes that a reference numeral (74, in Fig. 2 as filed) was found to have been duplicated, through inadvertence, in the application as filed. Specifically, in paragraph 0077, "an opening" was identified as element number 74. However, in paragraph 0080, "a housing and light assembly" was also identified as element number 74. Applicant has also submitted revised paragraphs 0080, 0081 and 0084 so that a "housing and light assembly" is identified as element number 75.

In addition, the reference numeral 80 (referring to a "system") was inadvertently omitted from paragraphs 0084 and 0085. The reference numeral 50 had also been omitted from paragraph 0084, line 10. Also, incorrect references to "housing portions 74" in paragraphs 0081 and 0084 have been replaced by references to "housing and light assemblies 75".

The Applicant submits that the foregoing amendments to the specification do not involve new matter, but instead are corrections of typographical or clerical errors in the specification as filed.

The Applicant notes that the enclosed replacement Fig. 2 is consistent with the amendments to the specification.

On the basis of the enclosed documents and the foregoing remarks,
consideration of this application and its early allowance are requested.

Respectfully submitted,

ED HAAS
